The Swedish Accident Investigation Authority's report RS 2017:05

On 15 November 2017, the Swedish Accident Investigation Authority published the final report RS 2017:05 which concerned the grounding of the vessel ASKÖ at Hässelby Holme, Stockholm County on 9 December 2016.

The report included three recommendations for the Swedish Maritime Administration. The Maritime Administration has submitted a response to the recommendations.

The measures that the Maritime Administration has implemented or plans to implement adequately incorporate the recommendations provided in the report. SHK therefore concludes that the recommendations can be considered taken care of and that the response received from the Maritime Administration is satisfactory.

Best regards,

Helene Arango Magnusson
Chair Accident Investigations
