Final report Derailment in Ludvika, RJ 2019:02

The Swedish Transport Administration has received a final report regarding the derailment of a freight train in Ludvika, Dalarna County, on 12 October 2017.

In the report, SHK makes two recommendations to the Swedish Transport Administration. Firstly, to evaluate the current regulations and implementation of procedures for track errors based on current regulations for the moving dynamics of railway vehicles, and secondly, to review the procedures for handling the disconnection of traction current in various situations.

The Swedish Transport Administration will implement both recommendations by investigating and reviewing the current regulations and procedures concerned. This must have been completed by 31/12/2019.

Kind regards,
