Response to implementation of recommendation

In preparation of winter 2018–2019, Infranord and the Swedish Transport Administration have added machine resources that are centrally controlled by the Swedish Transport Administration based on the needs of the infrastructure.

At the start-up meeting prior to the snowy season, we conducted a review of the available resources. We are also holding weekly snow-clearance meetings in order to review and prioritise the efforts.

Together, we have started a dialogue to jointly evaluate areas of improvement that we see in conjunction with disruptions, events and accidents in the infrastructure. Here, we will be working to improve the plan and order of priority in the snow clearance work.

Infranord has reviewed its organisation to clarify communication routes both within the organisation and with representatives of the Swedish Transport Administration.

Kind regards

Ronny Fredriksson
