Swedish Civil Contingencies Agency

Assessment of recommendation response from the Swedish Civil Contingencies Agency

On 11 May 2022, the Swedish Accident Investigation Authority (SHK) published the report RS 2022:05, which deals with a fire that broke out in conjunction with the loading of waste onto a vessel in the Port of Landskrona.

A total of nine recommendations were issued in this report, one of which to the Swedish Civil Contingencies Agency (MSB).

Recommendation RS 2022:5 R9

Compile information on the lessons learned by the Landskrona Fire Service from the incident and forward this to other rescue services that have ports for larger vessels within their operational area.

MSB has responded to the recommendations and has stated, among other things, that it intends to produce a video containing an experience and educational film that is intended for rescue services, the police and ambulance services.

SHK deems the safety recommendation to have been implemented (Concluded – satisfactory response).

Best regards,

Kristina Börjevik Kovaniemi
Chair Accident Investigations
