SOS Alarm Sverige AB

## Assessment of recommendation response from SOS Alarm Sverige

---

On 11 May 2022, the Swedish Accident Investigation Authority (SHK) published the report RS 2022:05, which deals with a fire that broke out in conjunction with the loading of waste onto a vessel in the Port of Landskrona.

A total of nine recommendations were issued in the report, one of which to SOS Alarm Sverige AB (SOS Alarm).

### Recommendation RS 2022:5 R7

Inform the alerted municipal fire services that the Swedish Transport Agency's ship inspector also is alerted when that is the case.

SOS Alarm has responded to the recommendation and has stated, among other things, that if SOS Alarm becomes aware of resources that have been alerted by the JRCC, e.g. the Swedish Coast Guard or the Swedish Transport Agency's ship inspector, SOS Alarm passes this information on to the relevant rescue service in geographic areas where SOS Alarm has an agreement with the rescue service to alert and manage rescue resources.

SHK deems the safety recommendation to have been implemented (Concluded – satisfactory response).

Best regards,

Kristina Börjevik Kovaniemi  
Chair Accident Investigations
