Assessment of recommendation response from WhiteWater West

On 20 March 2025 the Swedish Accident Investigation Authority (SHK) published a final report (SHK 2025:05) into a fire that occurred on the construction site Liseberg Oceana Waterworld in Gothenburg on 12 February 2024.

In the report, SHK directed one safety recommendation at WhiteWater West (SHK 2025:05 R5).

WhiteWater West was recommended to

- Take action to enhance compliance with established rules and procedures relating to safety. This action should include the promotion and maintenance of a good safety culture. (SHK 2025:05 R5)

WhiteWater West has responded to the safety recommendation and described what action that has been taken and is planned in light of the fact that it has entered into a contract with Liseberg to construct waterslides in conjunction with the reconstruction of Oceana. WhiteWater has stated that the company will have personnel on site in order to follow up the work of contractors that have been engaged and that they have ordered ID06 administration.

Although a number of measures are described in the response, these measures cannot be deemed to correspond to the measures SHK has recommended that the company put in place. The measures are also described in a very general way and it is not evident how the company intends to work with the promotion and maintenance of a good safety culture. In light of this, it is not possible to deem the safety recommendation to have been implemented (Concluded – unsatisfactory response).

Best regards,

Kristina Börjevik Kovaniemi
